# Smart Coder

Overview

The Integra Optics' SmartCoder allows you to rapidly reconfigure pluggable transceivers. It provides two plugs for SFP/SFP+ and XFP optical transceivers. SmartCoder enables you to easily reconfigure Integra Optics' transceivers for any network hardware. All you have to do is install the SmartCoder application and plug the SmartCoder in any computer USB port.

Benifits

- ➔ Power on your transceiver's laser, loop testing
- ➔ View optics coding history
- ➔ Reduce your inventory
- ➔ Quickly reconfigure SFP, SFP+, and XFP transceivers to virtually any OEM optic
- ➔ Tuning of XFP and SFP+ tunable transceivers for Channelized Operation
- ➔ Displays DDM levels of any manufacturer's transceiver

Features

- ➔ SFP/SFP+ and XFP ports
- ➔ Compact, ruggedized design for easy transport
- ➔ Powered by your USB port
- ➔ Intuitive web-based interface

Our Mission

Our mission is to ensure that our customers turn up services faster, build out the fiber networks they need to be competitive, and keep them up and running.
